Stretch robot BP-LEO

The stretch robot BP-LEO is an independent model for the automatic wrapping of pallets. The machine independently wraps pallets of almost any size. The minimum size for pallets is 400 x 600 mm. The film carriage is equipped with a photocell for automatic scanning of the pallet height.

Technical data

Dimensions of the machine	1100 x 600 x 2000 mm
Own weight	180 kg
Power consumption	230 V /0,5 KW
	Battery
Min. pallets	400 x 600 mm
Max. height	2000 mm
Speed	Up to 90 m/min
Noise emission	75 dB(A)
Additional information	Electromagnetic film brake Height query by means of a photocell (On request also for black film)

Functionality

- Infinitely variable travel speed
- Film carriage speed infinitely variable
- Photo cell for scanning the pallet height
- The number of foot and head wraps can be programmed
- Motor-assisted maneuvering

Bizzypack GmbH
Innovative packaging materials & machines

Advantages

- Autonomous work
- Suitable for oversized pallets
- Takes up little space
