

Bizzypack GmbH

Innovative packaging materials & machines

The pallet wrapper **BP-2000B** is our model for automatic wrapping of pallets with a pre-stretching system (250%). In combination with highly stretchable films, film consumption is reduced by up to 45%.

The turntable has a diameter of 1500 mm and is frequency-controlled. Optionally, through the recess in the turntable, the machine can easily be loaded by means of forklift trucks and pallet trucks.

Turntable speed: infinitely variable
Foil carriage speed: infinitely variable
Soft start and run-out of the turntable
Fixed stop of the turntable
Application voltage: infinitely variable

Photo cell for scanning the pallet height, optionally also for black foil
Number of foot and head wraps: programmable
Two automatic wrapping programs
Manual wrapping program
Optional: hold-down device

Technical data:

Machine: 2800 x 1580 x 2480 mm
Stand area: 2800 x 1580 mm
Own weight: 850 kg
Turntable diameter: 1500 mm
Load capacity: 1200 kg

max.pallets: 1200 x 1000 mm
max.winding height: 2100 mm
Speed: 0 - 12 rpm
Power consumption: 230 V / 1.25 KW
Noise emission: 75 dB (A)
Pre-stretching system 250% stretching
Height query by means of a photocell
